

## RENEWABLE ENERGY SOLUTIONS

The production and use of energy efficiently is a focus of Renu Energy since its inception. Most of our present activities grew out of a strategy of targeting sectors with the biggest energy needs, so we design commercial solar power plants and enter into solar production agreements (SPA) for the supply of clean electrical power to businesses, communities, and utility companies.

### The Problem:

America currently imports over 60% of its oil, nearly double the amount it imported in 1973. Global unrest, coupled with recent terrorist activity in the US and the Middle East, continues to put America at risk for its energy needs by jeopardizing its energy supplies.

### The Solution:

Renu Energy is helping to make America energy self reliant by providing clean, safe, renewable energy solutions to replace our dependence on fossil fuels. To help meet the country's growing energy needs, Renu Energy provides solar energy systems that are being implemented by companies all over the world.

Renu Energy connects its customers with informed intelligence and solutions that provide viable, alternative sources of renewable energy such as biodiesel, solar, hydrogen fuel cell, and recycled residential and commercial waste to provide energy for electricity, heat, and transportation. Homes, vehicles, and businesses around the world are beginning to move away from using fossil fuels to clean, renewable, sustainable solar, wind, and bio-fuels.

# Renewable energy solutions that work for your business.

EXPERIENCE. INTEGRITY. INTELLIGENCE.

## OUR RENEWABLE ENERGY SOLUTIONS PROVIDE:

- CLEAN, SUSTAINABLE FUELS.
- RELIABLE DESIGN.
- SOLID ENGINEERING.
- CLEANER AIR AND WATER.
- REDUCED ENERGY COSTS.

## reliable energy solutions for your business needs

### SOLAR POWER SOLUTIONS

The production and use of energy efficiently is a focus of Renu Energy since its inception. Most of our present activities grew out of a strategy of targeting sectors with the biggest energy needs, so we design commercial solar power plants and enter into solar production agreements (SPA) for the supply of clean electrical power to businesses, communities, and utility companies.

### SOLAR POWER SOLUTIONS

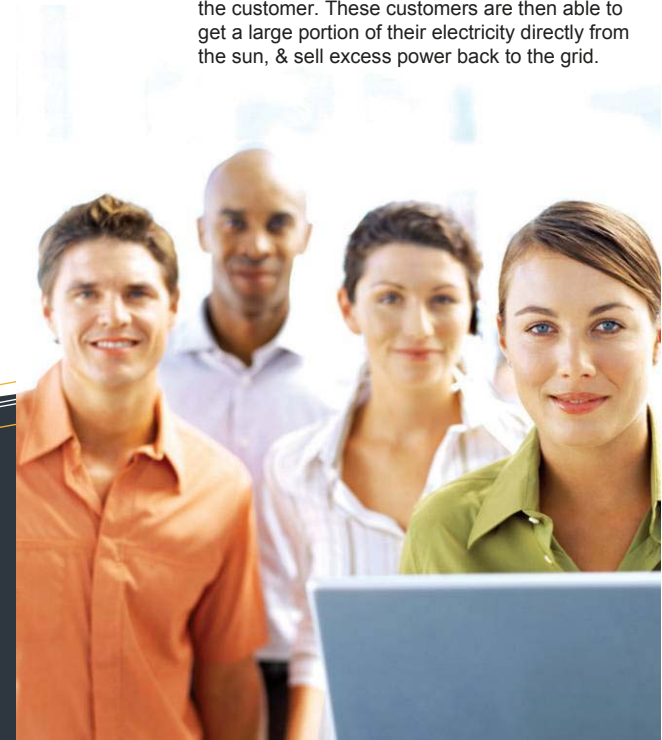

The production and use of energy efficiently is a focus of Renu Energy since its inception. Most of our present activities grew out of a strategy of targeting sectors with the biggest energy-saving opportunities, so we design commercial solar power plants and enter into power production agreements (PPA) projects for supplying clean electrical power to local utility companies.

### COMMUNITY SOLAR PROGRAMS

Renu Energy partners with financiers, solar equipment manufacturers, installers, and local community governments to provide solar systems at no initial cost to property owners. Our SOLAR FIRST programs enable communities to promote solar within the community and county.

### COMMERCIAL SOLAR PROGRAMS

Renu Energy also provides qualified commercial customers with solar systems at no initial cost to the customer. These customers are then able to get a large portion of their electricity directly from the sun, & sell excess power back to the grid.

WE WORK WITH A DIVERSE CUSTOMER BASE. WE CAN HELP YOUR BUSINESS.

Contact us today to see how we can save your business money by supplying its energy needs from the sun.
